

8- All the following are Causes of metabolic acidosis except?

- 1-Starvation,
- 2-dehydration,
- 3-constipation
- 4- Renal failure

9- IV dobutamine used to:

- 1- Decrease tissue hypoxia
- 2- Elevate blood pressure
- 3- Improve myocardial contractility
- 4 - Decrease chest pain

10 - Side effects of Nitroglycerin are numerous include

- 1- Hypertension & shock
- 2 - Headache & palpitation
- 3- Skin pallor & sweating
- 4- Orthopnea & bleeding

Second question: (25 degree)

Complete the following:

1- warning signs and symptoms of cancer are:-

- 1-----
- 2-----
- 3-----
- 4-----
- 5-----

2- The normal acid base balance is maintained by three primary complex mechanisms are:-

- a-----
- b-----
- c-----
- d-----

3- Effect of insulin deficiency is:-

- a-----
- b-----
- c-----
- d-----
- e-----

4- List Causes of hematuria?

- a-----
- b-----
- c-----
- 
- 
- 
- 

5- Sites of vein puncture?

- a-----
- b-----
- c-----
- 
- 
- 
- 

6- Types of enema?

- a-----
- b-----

8- All the following are Causes of metabolic acidosis except?

- 1-Starvation,
- 2-dehydration,
- 3-constipation
- 4- Renal failure

9- IV dobutamine used to:

- 1- Decrease tissue hypoxia
- 2- Elevate blood pressure
- 3- Improve myocardial contractility
- 4 - Decrease chest pain

10 - Side effects of Nitroglycerin are numerous include

- 1- Hypertension & shock
- 2 - Headache & palpitation
- 3- Skin pallor & sweating
- 4- Orthopnea & bleeding

Second question: (25 degree)

Complete the following:

1- warning signs and symptoms of cancer are:-

- 1-----
- 2-----
- 3-----
- 4-----
- 5-----

- 6- Nasotracheal suctioning is indicated with severe epistaxis & Tracheo esophageal fistula. ( )
- 7 - Chest physiotherapy (CPT) is indicated to facilitate clearance of retained secretions. ( )
- 8 - It is not important to check the blood product for Blood group and type or patient name. ( )
- 9 - Nosocomial Infection: is infection acquired in health care settings result from delivery of care. ( )
- 10- Normal urine volume range between 750-2000 ml/24 hours. ( )

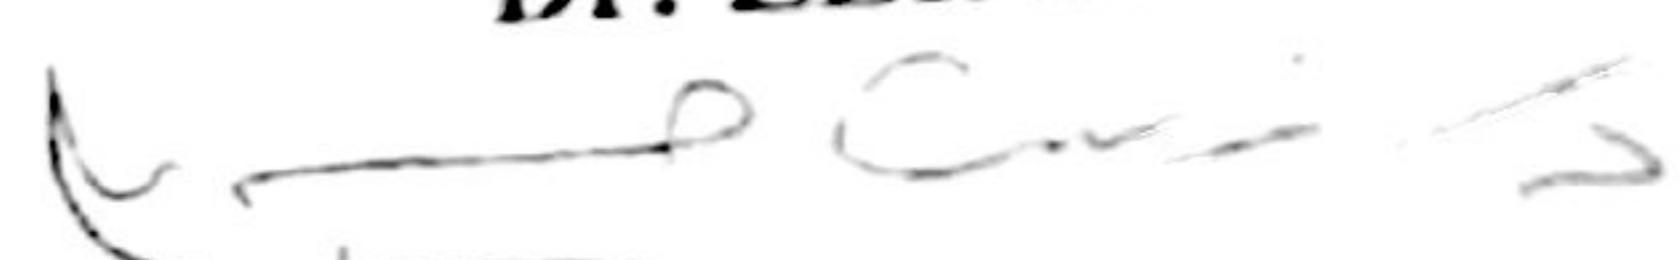

**Fourth question:- (25 degree)**

- Write the aims for each of the following.

- a- radiological test
- b- Barium swallow
- c- Barium enema
- d- Colonoscopy
- e- Upper GI Series

GOOD Luck

Dr: ZEINAB ALI

- 4- Protein function is all the following except:
- 1- Furnish building blocks (amino acids) to build and repair tissue
  - 2- Serve as an energy source
  - 3- Help form enzymes, hormones and other body fluids and secretion
  - 4- Serve as the sole source of energy for the brain

- 5- Complications of enteral tube feeding are all the following except
- 1- Hypervolemia (excessive fluid)
  - 2- Nausea and vomiting or diarrhea
  - 3- Aspiration pneumonia
  - 4- Gastrointestinal

- 6- All the following are Etiology and Risk Factors for hypothyroidism except?

- 1- Atrophy of the thyroid gland after years of Graves' disease or thyroiditis
- 2- Treatment for hyperthyroidism,
- 3- dietary iodine deficiency, high intake of goitrogens,
- 4- Increase in synthesis of the thyroid hormone.

- 7- All the following are factors affecting digestion except:

1. Psychological State
2. Bacterial Action
3. Food Processing
- 4- Age

7- Methods of oxygen therapy

- a-----
- b-----
- c-----

8- Complications of CVP.

- a-----
- b-----
- c-----

9- Edema defined as-----

10- Complete the missing part:

condition	ph	PaCO <sub>2</sub>	HCO <sub>3</sub>
Metabolic acidosis			
Metabolic alkalosis			
Respiratory acidosis			
Respiratory alkalosis			

IV- Mr. Mustafa is unable to empty his bladder completely inspite of his kidney produce sufficient amount of urine.

a- The diagnosis of Mr. Mustafa is -

b- The causes of his diagnosis could be

---

---

---

c- Intervention help Mr Mostafa are.

---

---

---

d- if Mr. Mustafa has no intervention and urine remain in his bladder for long time this could be lead to

- a- \_\_\_\_\_  
b- \_\_\_\_\_  
c- \_\_\_\_\_

e- If the result of urine analysis for him was RBCs in the urine so that the definitive causes for Mr. Mustafa diagnosis is

---

---

Sign The following (True) or ( False): (5 degree)

1- Mechanical complication of enteral nutrition include tracheo esophageal fistula. ( )

2- Monitoring patient's Level of consciousness by GCS ranged From (3-17), the higher score is normal. ( )

3- GCS include 3 responses Eye opening, Verbal response & Skin color. ( )

4- Homeostasis is the term used to describe the balance that the body maintains between fluid intake and fluid output. ( )

5- Inspection: includes visual examination of the patient. ( )

5- Post- endoscope nursing care that provided for Mr. Omar is.
