

2nd Year Nursing Students Researches, Adult Health
Nursing – 2020

1. Diabetic foot	
Topics	Items
A. Effect of patient educational program on decreasing diabetic foot complications for diabetic patients	<ul style="list-style-type: none"> - Title - Abstract - Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care) - Educational program
B. Nurses guide-lines for diabetic patients to decrease diabetic foot complications	<ul style="list-style-type: none"> - Title - Abstract - Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care) - Nursing guide lines
C. Prevention of foot ulcers for patient with high risk diabetes complications	<ul style="list-style-type: none"> - Title - Abstract - Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care) - Health education for diabetic foot patient (booklet or brochures)
D. Effect of applying foot exercise on improving vascular insufficiency for diabetic patient	<ul style="list-style-type: none"> - Title - Abstract - Introduction (definition, incidence, risk factors, causes,

	<p>diagnosis, medical management and nursing care)</p> <ul style="list-style-type: none"> - Health education for diabetic foot patient (booklet or brochures)
<p>E. Improving diabetic patient clinical outcomes by using self-education modules</p>	<ul style="list-style-type: none"> - Title - Abstract - Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care) - Self-education (booklet or brochures)

2. Endoscopy surgery

Topics	Items
A. Quality of life after laparoscopic surgery: evidence-based guidelines	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
B. Social and emotional support for patient before gastrointestinal endoscopy	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
C. Effect of using music to reduces anxiety levels in patients attending for endoscopy	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
D. Improving patient safety during gastrointestinal endoscopy	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes,

	<p>diagnosis, medical management and nursing care)</p> <ul style="list-style-type: none"> - Health education for diabetic foot patient (booklet or brochures)
<p>E. Nurses knowledge and practice regarding gastrointestinal endoscopy</p>	<ul style="list-style-type: none"> - Title - Abstract - Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care) - Health education for diabetic foot patient (booklet or brochures)

3. Anal disorders

Topics	Items
A. Effect of using warm bath on decreasing pain intensity for patient with hemorrhoids	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
b. Applying best practice for improving quality of life with anal fissure	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
c. Patient compliance to decrease recurrent attack of anal disorders	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
d. Relation-ship between anal disorders and patient life style	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes,

	<p>diagnosis, medical management and nursing care)</p> <ul style="list-style-type: none"> - Health education for diabetic foot patient (booklet or brochures)
<p>e. Designing guidelines for patient with anal disorders on decreasing recurrence of complications</p>	<ul style="list-style-type: none"> - Title - Abstract - Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care) - Health education for diabetic foot patient (booklet or brochures)

4. Cholecystectomy

Topics	Items
a. Developing discharge guidelines for patients undergoing laparoscopic cholecystectomy	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
b. Impact of nurse's experience on operation time in laparoscopic cholecystectomy	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
c. Assessment of postoperative nurses' interventions for the patients with laparoscopic cholecystectomy	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
d. Postoperative nurses' competency regarding cholecystectomy	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes,

	<p>diagnosis, medical management and nursing care)</p> <ul style="list-style-type: none"> - Health education for diabetic foot patient (booklet or brochures)
<p>e. Use relaxation technique to decrease pain intensity post-operative for patients with laparoscopic cholecystectomy</p>	<ul style="list-style-type: none"> - Title - Abstract - Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care) - Health education for diabetic foot patient (booklet or brochures)

5. Appendicitis

Topics	Items
Patient preparation program before appendectomy	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
Effect of implementing educational guide- lines on decreasing post-operative complications for patient with appendicitis	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
Developing nursing care stander by detecting early signs and symptoms of appendicitis	<ul style="list-style-type: none">- Title- Abstract- Introduction (definition, incidence, risk factors, causes, diagnosis, medical management and nursing care)- Health education for diabetic foot patient (booklet or brochures)
